p.3

Amendments to the Claims:

- 1. (currently amended) A supporting structure, comprising:
 - an elongate body member made of flexible material and being

bendable and foldable [with unlimited angle] into a plurality of shapes while retains the bent shape until subsequently reposition;

an exterior covering member, directly formed on the elongate body member by an injection mold process, wherein the exterior covering member exposes two ends of the clongate member and has a bellow configuration, wherein the exterior covering member has a diameter gradually reduced from two ends to a center thereof;

- a suction device, connected to one of the exposed end of the clongate body member; and a holding device, connected to the other exposed end of the elongate body member.
- 2. (original) The structure according to Claim 1, wherein the flexible material includes aluminum material.
- 3. (original) The structure according to Claim 1, wherein the exterior covering member includes soft plastic material.
- 4. (canceled).
- 5. (original) The structure according to Claim 1, wherein the elongate body member has a roughened exterior surface.
- 6. (original) The structure according to Claim 1, wherein the suction device includes a suction disk.
